

Applications

Patio Pavers offer a great alternative to traditional pavers and can be laid over a wide variety of existing hard substrates. Made from recycled rubber, patio pavers are long lasting, impact absorbing and very durable. This low maintenance and cost effective surface can be used in numerous outdoor areas in both domestic and commercial applications.

Benefits

- Hard wearing and durable
- Suitable for indoor and outdoor use
- Low maintenance
- Anti-slip and non-abrasive surface
- 100% recycled and environmentally friendly
- Easy to install and can be loose laid
- Large channels for quick drainage
- Completely hygienic
