

An attractive and extremely durable industrial flooring tile

Ecotile is an attractive and hard-wearing interlocking floor tile that has been designed to allow quick and simple installation without the need for gluing.

Ecotile is a flexible 7mm thick interlocking tile that can be dry laid over any hard surface with minimal preparation.

Because the tiles do not need gluing they are ideal for covering damp, damaged, dusty or oil contaminated floors where it is difficult to bond to the substrate or where the layout of the floor is subject to alteration to suit changing production demands.

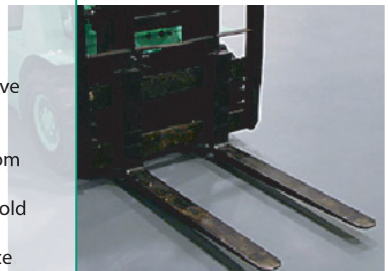

Ecotile Standard is available in 8 colours and 2 surface textures. It has good anti-slip properties and is simple to keep clean and maintain.

Suitable Industry Sectors:

- Automotive
- Aerospace
- Engineering
- Defence
- Textile
- Petrochemical
- Food & Beverage
- Distribution
- Utilities

Key Benefits:

- Extremely hardwearing and durable
- Resistant to most solvents and chemicals
- Reduces damage caused by impact, abrasion and vibration
- Good anti-fatigue and anti-slip properties
- Quick and simple to install
- Easy to clean and maintain
- Good thermal and acoustic insulation
- Layout is flexible, add or remove tiles to suit your changing requirements
- Protects your existing floor from damage
- Eliminates dust generated by old concrete floors
- Smart and modern appearance
- Ideal for installation over damaged or contaminated substrates
- A cost-effective and long-term flooring solution
