

How to make an internal corner:

1. Lay all **complete ramps** (fig.3) **A, B**, Until only the corner remains to be completed.
2. Take **ramp C**, cut off triangle **c1** following the markings on the underside. Repeat the instructions for **ramp D** cutting off triangle **d1**.
3. Discard the corners **c1** and **d1**.
4. Connect **ramp D** to **ramp A** and **ramp C** to **ramp B** (fig 4). This will complete your internal corner.
