

## A smart low maintenance flooring with exceptional durability

**Ecotile** interlocking floor tiles are the ideal floor covering for use in classrooms, technical suites, science labs, canteens and anywhere an attractive, hard-wearing, low maintenance floor is required.

Ecotile can be dry laid over any hard surface making it extremely quick and easy to install and so ideal for tight deadlines imposed by school holidays.

### Key Benefits

- Good anti-fatigue and anti-slip properties
- Good thermal and acoustic insulation
- Ideal for installation over damaged or contaminated substrates
- Protects your existing floor from damage
- Resistant to most oils, solvents and chemicals
- Reduces damage caused by impact, abrasion and vibration
- Layout is flexible, add or remove tiles to suit your changing requirements
- Smart and modern appearance
- Extremely hard-wearing and durable
- Quick and simple to install
- A cost-effective and long-term flooring solution

### Principal Advantages and Environmental Benefits of Ecotile:

Ecotile consists of 7mm thick interlocking tiles that are available in eight colours and two surface textures.

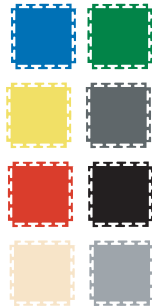

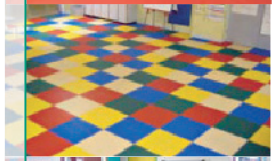

These can be combined to create attractive and fun floors to brighten up the whole room. Ecotile is extremely durable and hard-wearing and should last for up to twenty years in a school or college.

The tiles are very low maintenance as they can be lifted and replaced in a matter of minutes in the unlikely event of damage and PVC is exceptionally easy to clean - even chewing gum won't stick to it!

Ecotile is manufactured from up to 50% recycled PVC and can be recycled again at the end of its life making it the environmentally friendly alternative to conventional floor coverings.
